

MODEL AOD1.5

FEATURES

- **Stall-Free Design**—Our "posi-shift", tandem spool air distribution valve insures reliable operation in all types of low pressure and start/stop applications. Plus, fewer parts and no o-rings result in easier maintenance.
- **Oil-less operation**—No metal to metal wearing surfaces. State-of-the-art materials and precision-manufacturing techniques combine to provide the industry's original completely oil-less design. This design means: no oil misting into the environment no oil, lubricants or grease to contaminate your products. Our oil-less design results in lower operating and maintenance costs. This design has been field proven, working trouble-free since its introduction over 15 years ago.
- **Externally Serviceable Air Valve**—No need to disassemble the pump for routine maintenance. The air valve can be quickly and easily maintained with minimal downtime.
- **Quiet Operation**—Air valve design minimizes exhaust noise providing a significantly quieter work environment.
- **Variety of Elastomers**—AOD® pumps can be assembled with the elastomer that matches your application; Neoprene, Buna-N, Nardel®, Teflon®, Santoprene® and Viton® are all available.
- **Plastic Air Valve Body**— Models up to 1 1/2" incorporate plastic air valve bodies for greater corrosion resistance in aggressive environments.

Note: Stainless Steel models are not sanitary rated, but may be used in certain sanitary applications.

Metallic Models
AOD1.5

Patented lubrication-free, stall-free design.

Clean, safe and reliable pumping.

Sizes

Discharge x Suction x Air Inlet.

AOD1.5 - 1.5" x 1.5" x 3/8" NPT

Materials

Aluminum
Stainless Steel
Cast Iron

Applications

- AIRCRAFT INDUSTRY
- AUTOMOTIVE
- BEVERAGE INDUSTRY
- CHEMICAL AND PETROLEUM
- GLASS AND FIBERGLASS
- MARINE
- METAL AND STEEL
- MINE AND CONSTRUCTION
- PAINT
- PAPER AND WOOD
