

Custom Builds your Sutorbilt, Duroflow & Gardner-Denver CycloBlower Pack-

Application Specific Packages Available

Ober-Read draws upon more than fifteen years' experience to engineer positive displacement blower and vacuum pump packages. Our engineers can tailor a pre-packaged system to fit your specific requirements. Computer-aided sizing assures the most economical price. We stock the components, and our dependable technicians will custom assemble your system.

Blower and Vacuum Pump Packages in a Range of Sizes

With over 200 different blower and vacuum pump models available, the engineers at Ober-Read can design packages in a variety of sizes and arrangements based on the specific pressure or vacuum requirements of your company.

- Sutorbilt blower and vacuum pump packages are available in sizes ranging to maximum capacities of 15 PSIG, 24" Hg, 32,800 CFM
- Gardner-Denver CycloBlower packages are available with maximum capacities of 18 PSIG, 24" Hg, 6,050 CFM
- Duroflow blower and vacuum pump packages are available in sizes ranging to maximum capacities of 15 PSIG, 16" Hg, 4,000CFM

Custom Drives

Ober-Read will modify a positive displacement blower or vacuum pump package with variety of V-belt or coupling drive options, including:

- Constant speed electric motors, both single and three phase, ODP, TEFC, and XP
- Variable speed units with either mechanical or electronic speed adjustment
- Gasoline and diesel engine drives available.

Accessories

A wide variety of accessories are available through Ober-Read to further customize your vacuum pump or blower package to best suit your application. Some of the standard accessories are:

- Inlet filters
- Inlet & discharge silencers
- Flexible connectors
- Vacuum & pressure gauges
- Pressure & vacuum relief valves
- Pressure & temperature shutdown switches
- Rotary Valves
- Wear resistant elbow fittings

Provide us with your space and piping requirements and Ober-Read can provide packages in variety of arrangements.
